Description :	**DATACENTER PRO SERIES CABINETS** **Front and rear grilled doors and blind side panels**

Datacenters PRO series cabinets are designed for the containment of all kinds of server computers and 19" active components that are available in the networking market. The rack can house all the 19" accessories and it's suitable for the installation of specific accessories with greater depth to contain and support non-modular devices. They are available with a width of 600 or 800 mm and a depth of 1000 mm, provided with front and rear grilled doors and blind side panels. It is possible to customize the cabinets according to the needs of the customer.
