GOLD MEMBERSHIP PRIVILEGES

Calibration with Loaner Units

Don't risk rejection of results by using an out-of-calibration tester. Gold support includes one calibration and factory refresh per year at no charge at one of thirteen worldwide Authorized Fluke Service Centers. And by scheduling your calibration in advance (six weeks recommended), you'll receive a loaner unit, eliminating any downtime (available in most regions).

Your units will be precisely calibrated to factory specifications (traceable calibration certificate provided – calibration data is available at additional charge) using the full battery of proprietary Fluke Networks test procedures, adjusted/repared as necessary with genuine repair parts, software and firmware updates applied. Typical turnaround time for a calibration is five working days. If a loaner is not required or calibration cannot be scheduled in advance, Gold customers may opt to instead receive a shipping waybill plus first-on-bench priority, for reduced turnaround time.

Repair with Loaner Units

Unlimited, no-hassle, no-charge repair services including labor, parts and shipping with first-on-bench priority. A loaner unit or replacement unit will be provided during repair to minimize downtime.

Discounts and Members-Only Promotions

Special discounts may be offered to Gold customers on new products, enhancements and used demo equipment.

Accessories

Parts and accessories that shipped with your unit and have been qualified as defective or faulty by our technical assistance center will be replaced free of charge during the term of your Gold membership.
